About me

I am a passionate Full-Stack Developer currently focused on building modern, responsive, and user-friendly web applications. I enjoy turning ideas into real digital products and continuously improving my skills in both front-end and back-end development. My technical toolkit includes React, Node.js & Express.js and working with databases and APIs to create complete, scalable solutions. I am always learning new technologies, exploring best practices, and working on projects that challenge me to grow as a developer. I am especially interested in clean code, problem-solving, and creating meaningful user experiences. My goal is to become a highly skilled developer who delivers efficient, reliable, and impactful software.

Experience

Frontend Developer | CommunityDevs Group | Baku, Azerbaijan

NOV 2025 – Present

Worked in a team environment to build a web application using React and Tailwind CSS, collaborating closely with designers to implement UI designs accurately and responsively.

Frontend Developer | NV Studio | Baku, Azerbaijan

May 2026 – Present

Developed and maintained responsive web applications using modern frontend technologies including Next.js, React, TypeScript, and Tailwind CSS, translating UI/UX designs into pixel-perfect, accessible, and optimized user interfaces.
